DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-4, 6-8, 10-12, 14-16, 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Hartmaier (6,553,022).

Consider claim 1. Hartmaier teaches a network (fig. 1-2) that utilizes a modem for processing calls made through the network, comprising a server (authentication platform 218; col. 4, ln. 57 to col. 5, ln. 36, fig. 3); a search module (processor 230) for searching a database (234; col. 5, ln. 21-36); a billing aggregator module, a correlating module and a billing module (col. 4, ln. 54 to col. 6, ln. 10; especially col. 5, ln. 50 to col. 6, ln. 10).

Art Unit: 2643

Consider claims 2-4. Fig. 1-3, col. 4, ln. 54 to col. 6, ln. 10 read on the limitations of claims 2-4.

Consider claim 6. Hartmaier teaches a network (fig. 1-2) that utilizes a modem for processing calls made through the network, comprising a server (authentication platform 218; col. 4, ln. 57 to col. 5, ln. 36, fig. 3); a search module (processor 230) for searching a database (234; col. 5, ln. 21-36); a billing aggregator module, a correlating module and a billing module (col. 4, ln. 54 to col. 6, ln. 10; especially col. 5, ln. 50 to col. 6, ln. 10).

Consider claims 7-8. Fig. 1-3, col. 4, ln. 54 to col. 6, ln. 10 read on the limitations of claims 7-8.

Consider claims 10-12. Hartmaier teaches a network (fig. 1-2) that utilizes a modem for processing calls made through the network, comprising a server (authentication platform 218; col. 4, ln. 57 to col. 5, ln. 36, fig. 3); a search module (processor 230) for searching a database (234; col. 5, ln. 21-36); a billing aggregator module, a correlating module and a billing module (col. 4, ln. 54 to col. 6, ln. 10; especially col. 5, ln. 50 to col. 6, ln. 10).

Consider claim 14. Hartmaier further teaches the user places a telephone call via a modem pool (modem pool 210 or 260; fig. 2).

Consider claims 15-16. Hartmaier teaches a network (fig. 1-2) that utilizes a modem for processing calls made through the network, comprising a server (authentication platform 218; col. 4, ln. 57 to col. 5, ln. 36, fig. 3); a search module (processor 230) for searching a database (234;

col. 5, ln. 21-36); a billing aggregator module, a correlating module and a billing module (col. 4, ln. 54 to col. 6, ln. 10; especially col. 5, ln. 50 to col. 6, ln. 10).

Consider claim 18. The method as taught by Hartmaier is inherently performed for each of multiple users of the network who would like to access an ISP via a modem pool.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5, 9, 13, 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hartmaier (6,553,022) in view of Ronen (5,745,556).

Consider claims 5, 9, 13, 17. Hartmaier does not teach the network comprises a wireless network.

Ronen teaches the network comprises a wireless network (col. 10, ln. 6-29).

Therefore, it would have been obvious to one of ordinary skill in the art to utilize the teachings of Hartmaier in view of Ronen in wireless environment in order to obtain or gain more profits by expanding the system nationwide.
